man known for his pioneering work in the field of addiction treatment and specifically the development of two interview-based modalities to measure addiction severity and treatment needs: the ASI and the Treatment Services Review (TSR).

What Is The Addiction Severity Index?

The addiction severity index, or ASI, is an in-depth, interview-based assessment tool that provides a 'big picture' of how a person is functioning in seven areas of their life. During the addiction severity interview, two time periods are discussed: the past 30 days, and the entire lifetime of the interviewee. The interview relies solely on ...
