Important notes about CV carb tuning! To properly tune, you MUST: 1. Have selected the BEST main jet for full throttle power (not just a "good" main jet - we mean "the BEST main jet" for power at high rpm). That eliminates the common severe tweaking of the midrange and lower tuning ranges to compensate for a "wrong" main jet. 2.

CV Carb Tuning Procedures - Factory Pro

Instead, use the rule of: "2% leaner per 1500 feet" and the Calibration Reference Chart for your model carburetor. For example, with a #1405 at baseline calibration (location #1 on the chart) and intended operation at 6000 ft. altitude, you would want 6000 divided by 1500 x 2% = 8% leaner calibration.

PERFORMER SERIES THUNDER SERIES AVS AVS2 SERIES TUNING GUIDE

Tuning These guidelines should be followed when installing carburetors and other Keihin products: To avoid injury, carburetors should be installed when the engine is cold. Read the owners manual for your vehicle before installing any Keihin product to prevent any damage to the vehicle due to improper installation.
