The strong acid/strong base drops to a lower pH unlike the weak acid/strong base titration. This is because the strong acid and strong base balance each other, however, the strong base is stronger than the weak acid so the solution is more basic. 6. Compare and sketch a titration graph for a strong acid/strong base titration and the same ...

The equivalence point of an acid-base titration is the point at which exactly enough acid or base has been added to react completely with the other component. The equivalence point in the titration of a strong acid or a strong base occurs at pH 7.0. In titrations of weak acids or weak bases, however, the pH at the equivalence point is greater ...

## **Acid Base Titration Lab Chem Fax Answers**

An acid-base titration is a quantitative analysis of acids and bases; through this process, an acid or base of known concentration neutralizes an acid or base of unknown concentration. The titration progress can be monitored by visual indicators, pH electrodes, or both. The reaction's equivalence point is the point at which the titrant has exactly neutralized the acid or base in the unknown analyte; if you know the volume and concentration of the titrant at the equivalence point, you can ...
