The Electronic Flight Bag v2 (EFB v2) helps an air crew to perform all tasks more simply and efficiently, but more important: paperless. It provides access to necessary information much quicker, which greatly reduces the Pilot's workload. Fully functional 30-day trial version.

AviaSoft - High quality software for PC-based flight ...

An electronic flight bag (EFB) is an electronic information management device that helps flight crews perform flight management tasks more easily and efficiently with less paper. It is a general purpose computing platform intended to reduce, or replace, paper-based reference material often found in the pilot's carry-on flight bag, including the aircraft operating manual, flight-crew operating manual, and navigational charts (including moving map for air and ground operations).

Electronic flight bag - Wikipedia

Part 91F operators are required to comply with AC 91-78 Use of Class 1 or Class 2 Electronic Flight Bag (EFB), but do not need written approval. They should also validate compliance with FAR 91.503 (flying equipment and operating information for large/turbine powered aircraft) and FAR 91.21 (portable electronic devices) when using an iPad.
