tributions to optics education (1995). He is a Fellow of the OSA, the SPIE, and the IEEE. In 1987 he was elected to the National Academy of Engineering. The image distance z_2 from lens L2 must now satisfy $1/z_2 + 1/f_3 = 1/z_1$ or $z_2 = f_3 z_1 / (z_1 - f_3)$. Thus the image appears $5f_2 / 2$ to the right of lens L2. Fourier planes will be found at the following locations:

- In the plane where the illumination beam comes to focus; i.e. distance f to the right of the object.

Introduction To Fourier Optics, Third Edition, Problem ...

Based upon Maxwell's equations for the electromag- netic field and using modern transform mathematics, principally Fourier transform theory in the solutions, Fourier Optics is particularly well suited to the study of cascades of lenses and phase masks as are widely used in optical instruments ranging from microscopes to telescopes, i.e., linear optical systems.
