Throughput Accounting And The Theory

Throughput Accounting is the accounting and financial management method used in Theory of Constraints. In Throughput Accounting you do NOT allocate costs. The elimination of this allocation removes distortions found in other forms of accounting like Cost Accounting and Lean Accounting.

Throughput Accounting

Throughput Accounting is a management accounting technique used as the performance measure in the Theory of Constraints (TOC). It is the business intelligence used for maximizing profits, however, unlike cost accounting that primarily focuses on 'cutting costs' and reducing expenses to make a profit, Throughput Accounting primarily focuses on generating more throughput.
